

IN THE CLAIMS

1-7 (Canceled)

8. (currently amended) A method comprising ~~for~~ applying a manganese phosphate layer ~~layers~~ to an iron or steel surface of a workpiece by surfaces comprising contacting the iron or steel surface ~~workpieces~~ with a phosphating solution comprising

0.2 to 4 g/l of iron (II) ions
10 to 25 g/l of manganese ions
25 to 50 g/l of phosphate ions (calc. as P_2O_5)
3 to 35 g/l of nitrate ions
0.5 to 5 g/l of nitroguanidine

said solution having 7 to 24 points of free acid, 50 to 140 points of total acid, and an S value of 0.2 to 1, and drying the workpieces to form a manganese phosphate layer having a minimum thickness of 2 μ m and an average maximum roughness depth (R_z) of from 1.3 to 2.5 μ m.

9. (previously presented) The method according to claim 8, wherein said phosphating solution that comprises 0.5 to 2 g/l of nitroguanidine.
10. (previously presented) A method according to claim 8, wherein the phosphating solution comprises not more than 2.5 g/l of iron (II) ions.
11. (previously presented) A method according to claim 8, wherein the workpiece is steel and said phosphating solution comprises a complex-forming agent for the alloying constituents of the steel.
12. (previously presented) A method according to claim 11, wherein said complex-forming agent is citric acid.

25794474.2

13. (previously presented) A method according to claim 8, wherein said phosphating solution further comprises at least one metal ion selected from the group consisting of

0.2 to 4 g/l of nickel ions and

0.2 to 4 g/l of magnesium ions.

14. (previously presented) A method according to claim 8, wherein at least a portion of the manganese ions in said phosphating solution are replaced by manganese carbonate to neutralize free acid.

15. (previously presented) A method according to claim 8, wherein said workpieces are subjected to a sliding friction.

16. (previously presented) A method according to claim 8, wherein said workpieces are selected from the group consisting of axles, gear mechanism parts and engine pistons.
